

VEROUS

TECHNOLOGIES

POWERED BY:

TOGETHER. EMPOWERING YOUR MISSION.

DEVSECOPS

- Risk mitigation, technology forecasting, evaluation, & implementation
- Cloud, hybrid & on-premise based enterprise container platforms
- IT portfolio & budget optimization through asset rationalization

END-USER SERVICES

- IT device provisioning and lifecycle management
- Full Information Technology Services Management (ITSM)
- Information Assurance standards compliance management

MOBILITY MANAGEMENT

- Multi-factor authentication integration with enterprise ICAM services
- Enterprise Mobility Management (EMM)
- Mobile Application Management (MAM)

ENTERPRISE IT

- Cloud native web & mobile enterprise app development services
- Full stack developers
- Agile development processes
- DevSecOps CI/CD pipeline automation

SOFTWARE DEVELOPMENT

- Pipeline managed automation of applications and infrastructure
- Enhanced deployment of containerized applications to cloud infrastructure
- Automated security, performance, usability, and functionality testing compliance

CYBERSECURITY

- Cybersecurity and information assurance
- Vulnerability assessment and management
- Automated compliance and reporting

Through TekFive's prime contract, Iron Bow and TekFive provide help desk services to the Veteran's Benefit Administration.

- 100% of tickets resolved
- Average abandonment rate <1%
- Consistently meets all contractual SLA's

Together, Iron Bow and TekFive developed a tailored DevSecOps approach for the VA OCC, enabling continuous scanning of all VA container images from approximately 250 container repositories in both staging and production environments.

- Vulnerability exposure window reduction of ~60% for critical and high severity vulnerabilities.
- Saved over 500 working hours in December 2021 during the Log4J vulnerability exposure.

TekFive and Iron Bow developed and implemented VA Pulse for the OCC, an analytics platform that provides near real-time usage data for applications.

- Traced over 27 million visits to the OCC portfolio of apps.
- Across 700,000 distinct users who have used those apps.
- Tracing engagement of 37 key flows and feature areas the apps provide to those users.
