

ACCELERATING MISSION SUCCESS THROUGH THE POWER OF PARTNERSHIP

Federal agencies face increasing pressure to modernize technology, strengthen cybersecurity, improve user experiences, and deliver measurable mission outcomes—all while meeting Small Business contracting objectives.

Verous Technologies is an SBA-certified Mentor-Protege Joint Venture between **Iron Bow Technologies** and **TekFive**, bringing together the scale, resources, and enterprise expertise of a leading IT solutions provider with the agility, innovation, and socioeconomic advantages of a certified Small Business. Together, Verous provides agencies with a powerful acquisition vehicle that reduces risk, accelerates outcomes, and supports federal procurement goals.

WHY VEROUS?

Enterprise Capability. Small Business Access.

Verous Technologies enables agencies to:

Access enterprise-class technical expertise and delivery resources

Reduce acquisition complexity and program risk

Accelerate modernization initiatives with proven methodologies

Leverage a team with established federal past performance

Benefit from mature program management, governance, and operational excellence

Combined Strength. Proven Results.

Iron Bow Technologies

- Nationally recognized federal IT solutions provider
- Deep expertise in networking, cybersecurity, cloud, AI & data, and workplace modernization
- Extensive federal contract vehicle access and large-scale program delivery experience
